

## VIBRO SCREEN

VibroScreens / VibroSwifters are used for grading of dry and wet materials in varied industries. Our multi deck vibro screens are widely used in cashew industry to screen out the small impurities and broken grades from whole kernels. 36 inch (900mm) & 48 inch (1200mm) screens are used in multiple deck configuration. Apart from cashew, grains, pulses, powder screening options are available in the range.
